

Monitor Alert Delay – Grace Period

The Grace Period, also called the **Monitor Alert Delay**, refers to the length of time set between a worker missing their check in and when their monitor will receive an alert.

The system is set up this way to give the worker longer to respond to avoid false alarms.

1. To set it up go into the Ok Alone dashboard and select 'Settings' on the left-hand toolbar.

2. Select the drop-down menu for 'Monitor Alert Delay'. Choose a length of time by clicking on it.

3. Click 'Update Settings' at the bottom of the screen to save your choice.
