

How Monitors use Ok Alone

What is Ok Alone?

Ok Alone is a Lone Worker Safety Monitoring system

- **Workers** use an app to check in at regular intervals during their work day
- If a Worker misses their check in, and the grace period expires, Monitor Alerts are issued
- **Monitors** receive Alerts and use the web based Dashboard to obtain the most up to date information

What is my role as a Monitor?

- ✓ If your assigned Worker misses a Check In, does not respond to a Man Down Check In, or has been set up with Shift Start or Shift End times, and does not start or end their shift, **you will be alerted**
- ✓ If your assigned Worker uses the Help feature, for immediate assistance, **you will be alerted**
- ✓ Alerts are sent by sms, an auto-call, an email, WhatsApp messaging
- ✓ Follow the Escalation included in the Alert or your Organization's procedures

Alerts advise who created the ‘incident’ and the type of alert

Email

- Acknowledge or Accept the Alert button, to take action
- Link to Dashboard (mobile capable)
- Includes type of alert, who it is, location, and steps to take
- Resolve the Alert button

SMS

- Link to Dashboard (mobile capable)
- Click to dial Worker’s phone number

Auto-Call

- Advises who created the alert and to go to the Dashboard to investigate

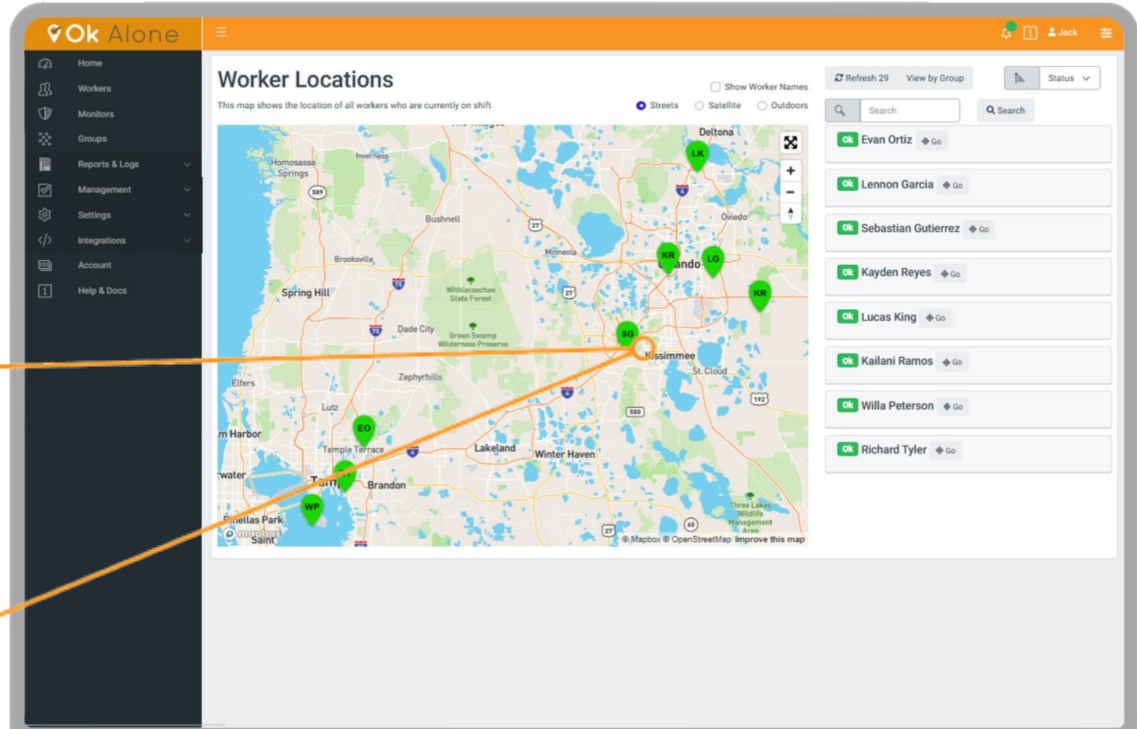

WhatsApp

- Link to Dashboard (mobile capable)
- Click to dial Worker’s phone number

Locate staff quickly

It's easy to find staff in an emergency even while they are on the move!

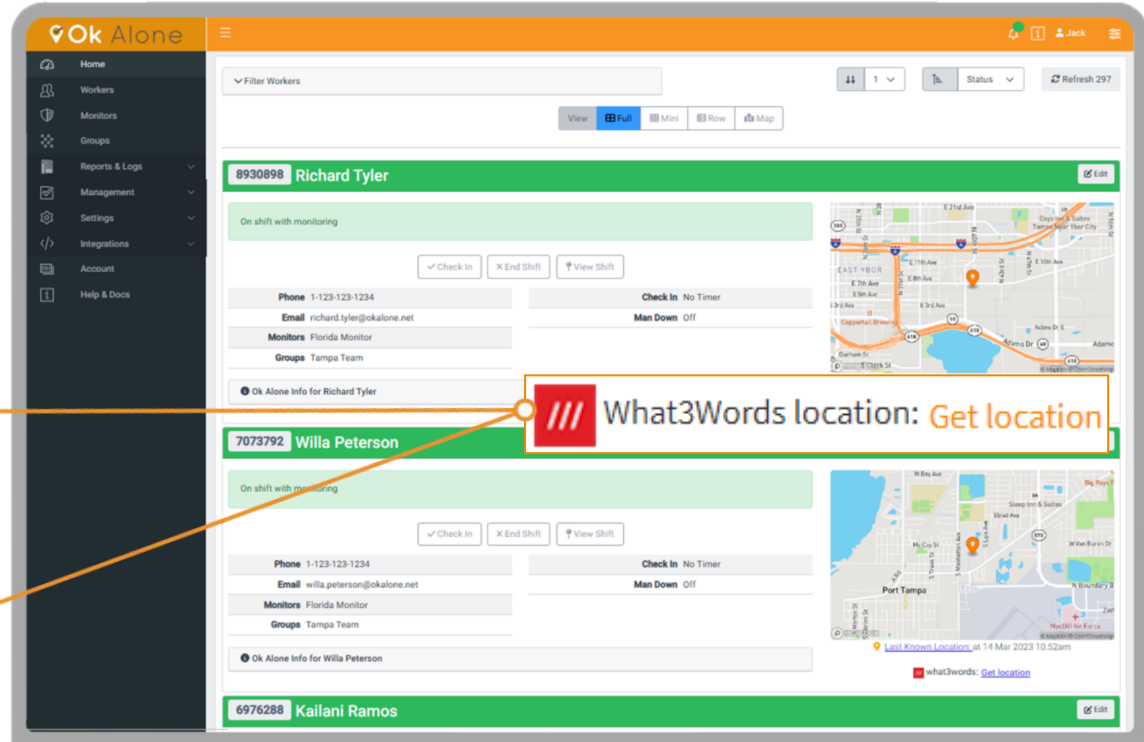

- ✓ GPS pin points the location of your workers for complete safety coverage

What3Words

- Ok Alone has partnered with What3Words!
- What3Words has divided the world into precise 3 metre square locations, in their 3 word format, to locate your Lone Worker

Example *///limit.broom.flip*

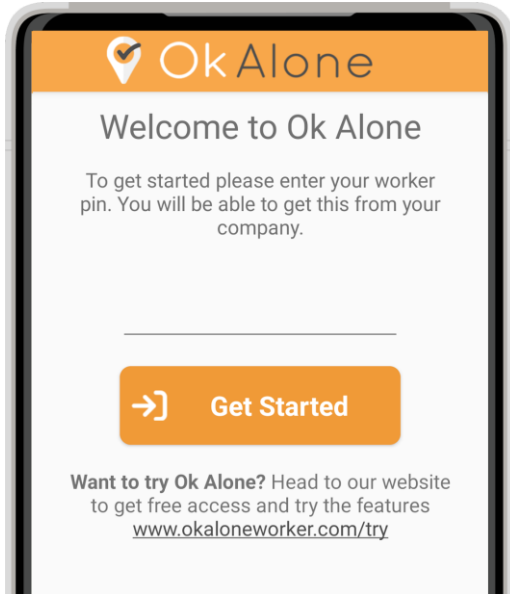

The screenshot displays the Ok Alone web application interface. On the left is a dark sidebar with navigation links: Home, Workers, Monitors, Groups, Reports & Logs, Management, Settings, Integrations, Account, and Help & Docs. The main content area shows a list of workers. The first worker is Richard Tyler (ID 8930898), followed by Willa Peterson (ID 7073792), and Kailani Ramos (ID 6976288). Each worker's profile includes fields for Phone, Email, Monitors, and Groups, along with status indicators like 'On shift with monitoring', 'Check In', 'X End Shift', 'View Shift', 'Check In No Timer', and 'Man Down Off'. A red box highlights the 'What3Words location: Get location' button next to Willa Peterson's profile. The interface also features a top navigation bar with the Ok Alone logo, a user profile (Jack), and a bottom navigation bar with a map view.

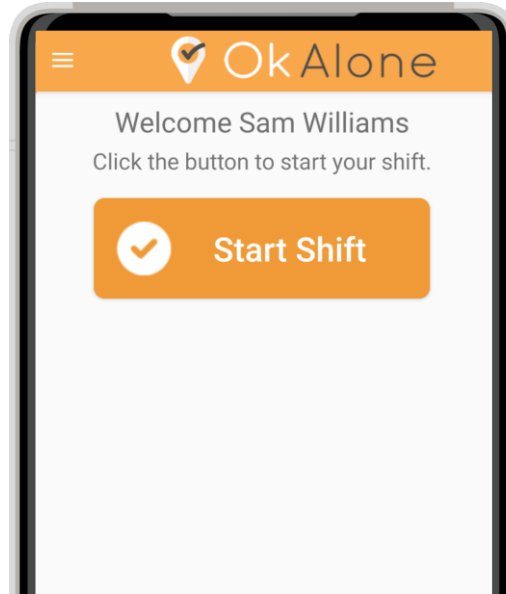

Worker's perspective?

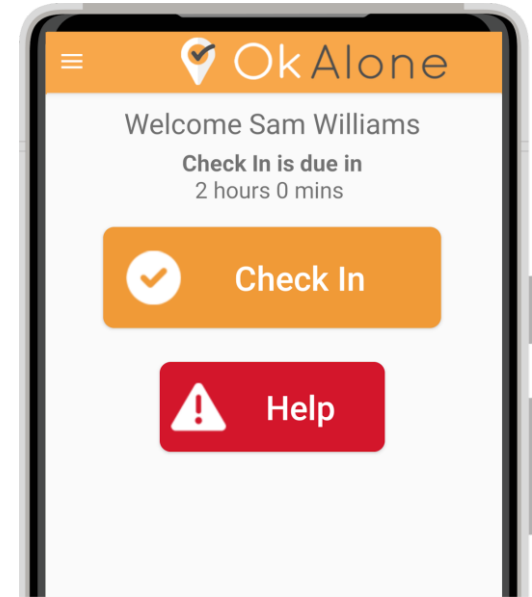

Log in once

Start shift daily

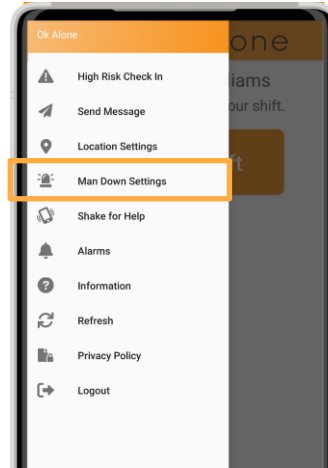

Check in & end shift

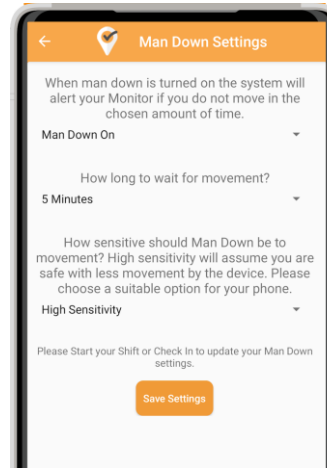

Man Down Check In

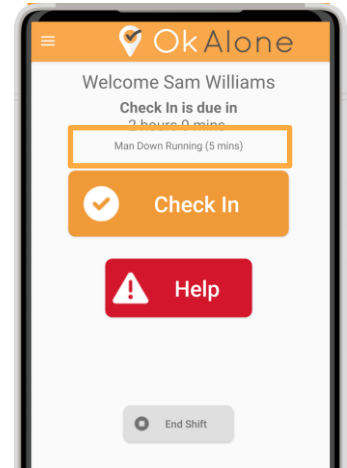

- Detects directional movement of the phone, within a set amount of time
- If movement is not detected, app will sound an alarm, signaling Worker to check in
- If Worker does not check in, Monitor Alerts will be issued

Select Man Down
from the
main menu

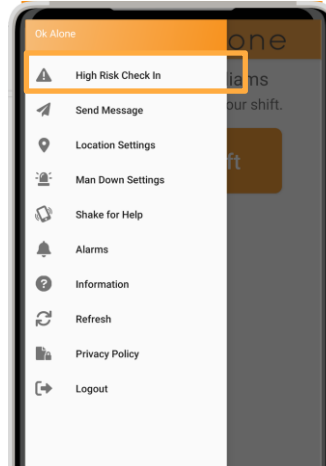

Turn Man Down on
and choose the
movement timer.
Optional sensitivity
can also be set.

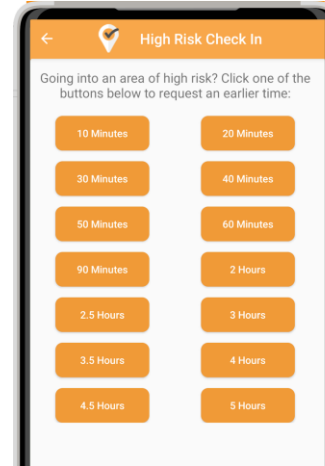

Man down will run
even when the app is
in the background

High Risk Check In

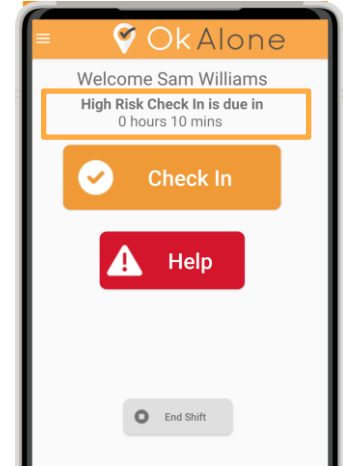

- There are times when a Worker is entering a high risk situation or job duty
- The Ok Alone app gives the Worker a choice for a quicker check in time.
- If the Worker does not check in, Monitor Alerts will be issued
- Once the shortened cycle is complete, the system resets to the normal check-in frequency.

Select High Risk
Check In from the
main menu

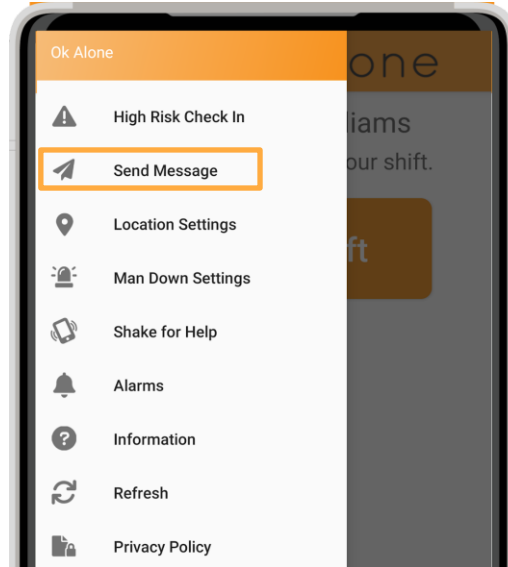

Choose a suitable
time based on the
situation you are
entering

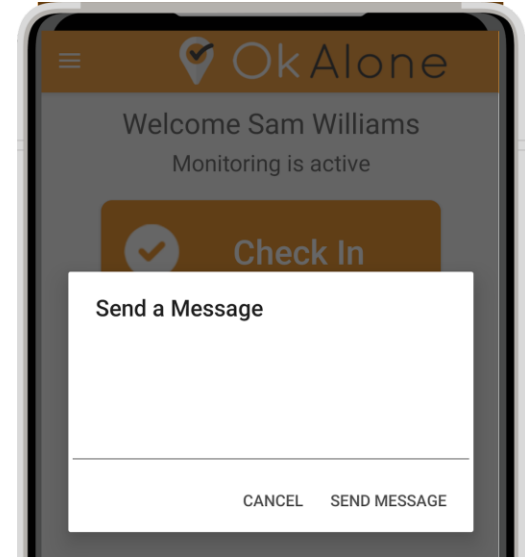

Timer will start,
check in when
you are ok or
when the timer
expires.

Workers send a Message

- Change of route, change of schedule
- Location prior to out of network coverage
- Meeting notification, phone on silent
- Send a message into the system, captured in Actions Logs and on Dashboard
- Send a message into the system and to Monitors, to action or not

Select
Send Message from the
main menu

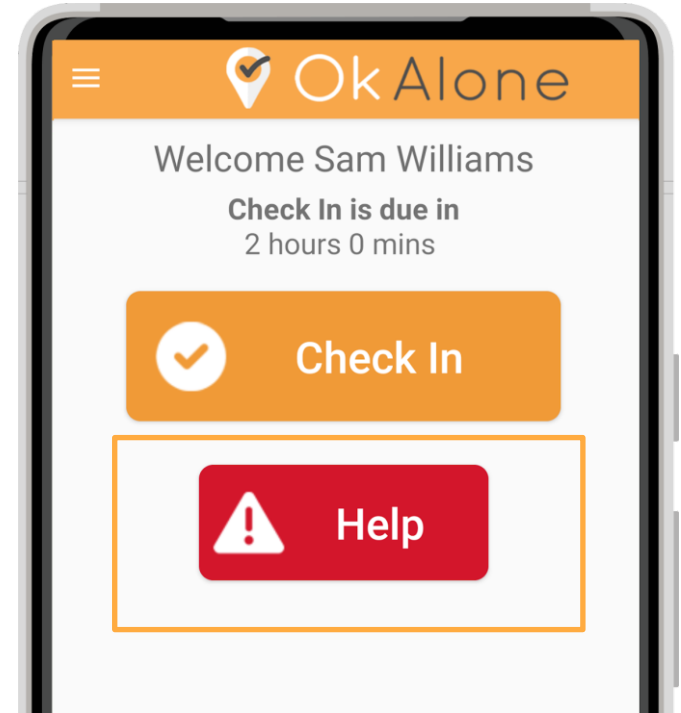

Enter your message. This will
help monitors if there
is an alert

Workers can send a Help Alert

If a Worker finds themselves in a situation where they need someone to come or to call them immediately:

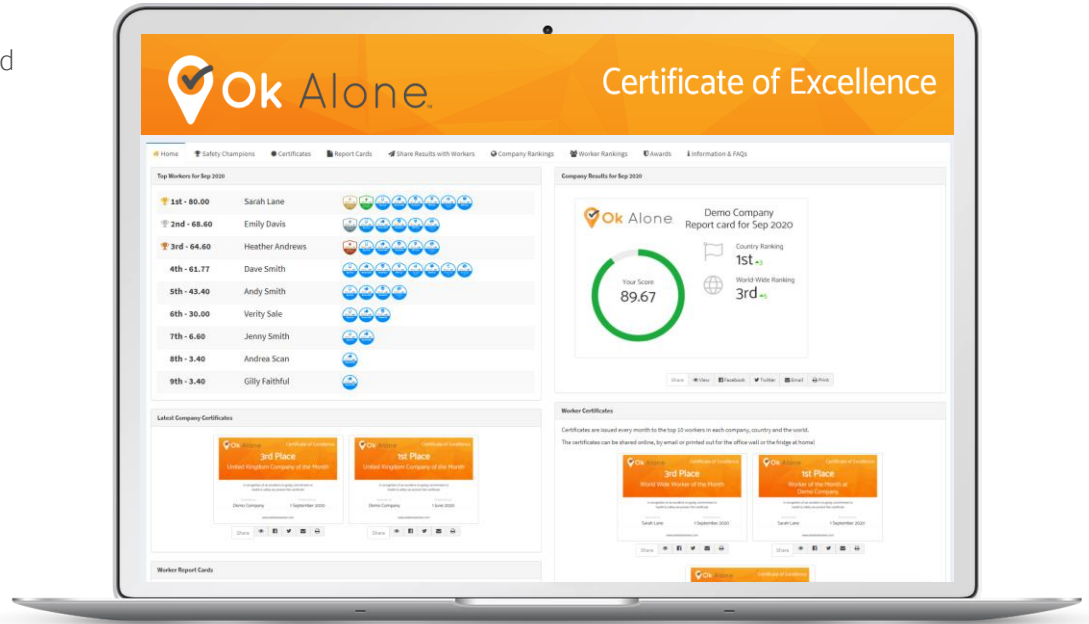

- Workers simply click the Help button
- Or, they can use voice activation to call out for help, keeping them hands free
- No Grace Period - - > **Monitor is alerted immediately**
- Monitors are to follow the Escalation Procedure, which may include sending Emergency Services to their location

Our exclusive Safety Awards!

- Keeping your workers safe is important to us!
 - Staying safe is very important to your workers and your company!
 - But just because something is important, doesn't mean it can't be engaging and fun too!
- ✓ PDF Certificates
 - ✓ Report Cards
 - ✓ Group Awards
 - ✓ Share with your team
 - ✓ Share across Social Media platforms

Who will be the **#1 WORKER**
in your company, your country, or in the world?!

Useful info:

- Log in with your email to my.okalone.net 😊

...(No need to start a new trial or set up your own account)

- Use the 'Forgot Password' feature to set or reset one 😊
- The Dashboard is a website, accessed thru a web browser, not an app 😊
- For convenience, save the Dashboard to your favourites on your computer 😊
- For convenience, save the Dashboard **to** your phone as an icon
